Subject: Track Shoe asking for Downtime Monitoring -- SI201.001 SII Specialist Daily Report V01-Farida 2020-02-24

1) Thanks for noting Track Shoes request to be able to monitor Line Down Time. It also shows they are interacting with us and interested in Vaeso LIVE.

2) Bill: food for thought; if in QCG we create a functionality in the "..." button to be able to click on a button for "Machine Down" with a drop down for the machine (DB for machines already exist):

- The accuracy of the data will be dependent on someone shouting to the QCG "my machine down", "my machine is up" shouting can be from 10, 20, 30... meters away
- And are we cannibalizing the need for All Artisan we have already designed the UI for the Artisan to click on "Machine Down" (for their own machine); they will obviously be incentivized to click on "Machine Down" as it exonerates them from poor productivity because they are not able to work because their machine is down.
- 4) Clement: need you to add such requests in the corresponding Page in the Roadmap excel for Vaēso LIVE>

5) Balaji: please add Clement to the Vaēso LIVE SII Daily report.

6) In other words, is it worth doing it for QCG or wait for All Artisan. Typical question when we are thinking of increasing the vale-ROI of a Basic product which may or may not reduce the value-ROI of the Premium
